Automation Engineer (Software Improvement)

Job Overview

We are seeking an Automation Engineer (Software Improvement) to develop and support software systems for manufacturing operations. This role involves integrating machines with IT systems, maintaining MES, and improving production efficiency through data and automation.

Key Responsibilities

- Develop and maintain Mobile/PC/Web-based applications and databases to support internal departments
- Support and maintain MES, SIE, and Line Manager systems to ensure high availability and stability
- Integrate machines with server systems via LAN network (TCP/IP)
- Develop or enhance software applications to support product station routing updates based on requirements
- Install and configure LAN cables for machine connectivity
- Collaborate with IT to configure IP addresses, ports, and network infrastructure (switch/hub)
- Monitor and maintain production metrics (OEE, AD, TBS)
- Troubleshoot software, network, and system issues in production environments
- Analyze system data and propose improvements to enhance production efficiency
- Coordinate with cross-functional teams (Production, IE, QA, IT)
- Ensure system reliability and minimize machine downtime

Qualifications

- Bachelor's degree in Automation Engineering, Computer Engineering, Electrical Engineering, or related field
- Experience in software development (e.g., C#, Python, Node.js, React, Node-Red, Docker, Grafana)
- Basic understanding of MES systems and manufacturing processes
- Basic knowledge of ERP and API integration
- Knowledge of network communication (LAN, TCP/IP, Modbus)
- Experience of working with databases (SQL Server, MySQL)
- Strong analytical and problem-solving skills
- Ability to work independently and in a team environment

Why Join Us?

- Work in a diverse and international environment focused on smart and sustainable manufacturing
- Career development programs with continuous growth opportunities
- Comprehensive medical insurance for you and your family
- Competitive bonus and quarterly incentives
- Free company shuttle service
